

PATENT

**ALBUMIN DERIVATIVES
WITH THERAPEUTIC FUNCTIONS**

RHONE-POULENC SANTE

ABSTRACT

Utilization of albumin as a stable plasma transporter with a therapeutic function that is derived from a membrane receptor. The present invention is exemplified by the description of new therapeutic agents that can be used in the treatment of Acquired Immunodeficiency Syndrome: hybrid macromolecules composed of albumin derivatives coupled to derivatives of the CD4 receptor having a normal or a higher affinity for the HIV-1 virus.
